

AIRPORT SAFETY, SANYCAR ANNOUNCES A STRATEGIC PARTNERSHIP AGREEMENT WITH THE BRITISH COMPANY UV-TECHNOLOGY GLOBAL

May 3rd - **Sanycar** is pleased to announce that it has signed a strategic partnership agreement with **UV Technology Global**. The two companies will join efforts to develop new sanitation and disinfection solutions based on UV-C technology tailored to high-traffic-density and high-contamination-risk settings, such as airports, supermarkets, hospitals, and public buildings.

UV Technology Global, a Liverpool-based company and European leader in the UV-C market, will contribute its decades-long experience on four continents to the new and ambitious project, together with a dedicated team of specialists.

Gianni Delogu, founder and CTO of Sanycar, commented: "The strategic alliance with UV-Technology Global will significantly strengthen our ability to reach new vertical and geographic markets, and to develop cutting-edge solutions for our customers all over the world."

Background info

Sanycar is a start-up company based in Oristano, Italy that specializes in innovative sanitation and disinfection solutions, based on a UV-C proprietary technology. On March 26, Sanycar installed at Cagliari Elmas Airport (IATA: CAG), the first system in the world for the disinfection of security screening trays, wheelchairs, and luggage trolleys.
